

PR-11

- It consists of 2 game elements, stair climbing and globe rope climbing.
- Climbing stairs; min. it consists of 8 steps of Ø 60 SDM pipes with a wall thickness of 2 mm.
- It is manufactured in such a way that there are steps that decrease as it rises so that it can fit the sphere format.
- Spherical climbing rope game element; Mesh ropes are attached to the Ø 60 pipe with a clamp system.
- The ground clearance of the game element is 244 cm.
- The pipes are baked for 20 minutes in a 200°C oven by performing polyester-based electrostatic powder coating process.
- The connection points of the pipes with the concrete floor are connected by the sheet flange welding method.
- Steel structured rope is used in the sphere rope rake.
- The mesh rope has a diameter of at least Ø16 mm.
- Each rope consists of 6 steel rope coils consisting of 7 steel threads around the center made of polyamide raw material fiber.
- Steel cored rope consists of 42 reinforced steel ropes in total.
- It does not contain toxic substances in its contents and paint.
- The outside of the rope is knitted with polyamide ropes.
- Steel wires are manufactured in such a way that they remain in the center of the polyamide ropes so as not to contact the user.
