

PR-14

- Bridge-shaped drawstring game element; Ø 89 SDM bent in a semicircle it is mounted together with Ø 60 SDM pipes with a wall thickness of min. 2 mm.
- 4 m of 14*14 steel rope was used to swing.
- The mesh rope, which is Ø16 mm, is mounted with a V-shaped clamp system.
- The height of the game element from the ground is 305 cm.
- The pipes are baked for 20 minutes in a 200°C oven by performing polyester-based electrostatic powder coating process.
- The connection points of the posts with the concrete floor are connected by the sheet flange welding method.
- Steel structured rope is used in tunnel climbing.
- Each rope consists of 6 steel rope coils consisting of 7 steel threads around the center made of polyamide raw material fiber.
- Steel cored rope consists of 42 reinforced steel ropes in total.
- There are no toxic substances in the content and paint.
- The outside of the rope is knitted with polyamide ropes.
- Steel wires are manufactured in such a way that they remain in the center of the polyamide ropes so as not to contact the user.
