

PR-20

- Rope climbing game group; Ø 16 diameter polyester yarn braided steel rope it is produced with Ø 140 SDM pipe with a wall thickness of min. 4 mm in such a way that it forms a climbing system with connecting to the ground and tensioning elements.
- The pipes are baked for 20 minutes in a 200°C oven by performing polyester-based electrostatic powder coating process.
- Each rope consists of 6 steel rope coils consisting of 7 steel threads around the center made of polyamide raw material fiber.
- Steel cored rope consists of 42 reinforced steel ropes in total.
- It does not contain toxic substances in its contents and paint.
- The outside of the rope is knitted with polyamide ropes.
- Steel wires are manufactured in such a way that they remain in the center of the polyamide ropes so as not to contact the user.
- The installation of the game group on the ground is carried out with the main pole and 4 side rope arm tools.
- The main pipe is installed on the floor with a flange.
- The connection points of the steel ropes with the concrete floor are made with laser-cut platinum.
- The ground height of the game group is 280 cm.
