

## **PR-23**

- Game element; It is made of Ø 114 SDM pipe with a wall thickness of min. 2 mm and the cutting points of the horizontal and vertical pipes are connected to each other with dovetail metal clamps with a wall thickness of at least min 3 mm.
- Open top parts of Ø 114 mm diameter SDM pipes are mounted to each other with kinetic double connection.
- Kinetic double coupling; It is produced from polyethylene material for indoor and outdoor use.
- It is resistant to UV lights and is designed not to harm the user.
- Kinetic double coupling; It weighs 6 kg.
- After the clamp connection, there are no protrusions or sharp corners that may cause injury anywhere.
- Mushroom figures are mounted by Ø 32 mm pipes and Ø 60 mm pipes.
- Pipes are painted with polyester-based electrostatic powder oven paint by baking.
- In mushroom walking, 10 mushroom figures made of self-colored polyethylene plastic material LLDPE (Linear Low Density Polyethylene) are used.
- Ø 114 SDM vertical pipes are flange mounted to the floor.
