

PR-24

- Game element; the cut points of the horizontal and vertical pipes made of Ø114 SDM pipe with a wall thickness of min. 2 mm are connected to each other in a right angle with doetail metal clamps with a wall thickness of at least min. 3 mm.
- The open parts of the 114 mm diameter SDM pipes are detailed, shaped with hemispherical injection molds, sealed with self-colored plastic plugs and riveted to prevent rust caused by water and moisture.
- Walking mushroom 4 side pillars, minimum 2.5 m long Ø 114 SDM, (2 pcs 2.5 m long Ø114 pipes 1 m long Ø 114 pipe are welded in H shape.)
- Mushroom figures are mounted by attaching to Ø 32 mm (10 pieces) diameter pipes and Ø 60 mm (2 pieces) diameter pipes.
- Pipes are painted by baking with polyester based electrostatic powder baking paint.
- The mushroom walk uses a mushroom figure made of 10 pieces of self-colored polyethylene plastic material lldpe (Linear Low Density Polyethylene).
- Ø 114 SDM vertical pipes are mounted on the ground with flange and anchor cover.
- After the clamp connection is made, there are no protrusions, sharp corners that can cause injury anywhere.
