

PY-04 House Roof

- The house roof is manufactured from polyethylene plastic material, LLDPE (Linear Low-Density Polyethylene) with a minimum height of 89 cm, by rotation molding method, in two parts as body and upper apparatus, in self-color.
- In accordance with TS EN 1176-1, when measuring on the platform, the height between the platform and the roof is at least 1800 mm.
- The house roof is manufactured to be directly connected to the main construction.
- No connecting element is used in between.
- The roof of the house is completed by mounting 2 large figures on the side surfaces with screws.

Dimensions	Length	161 cm
	Width	181 cm
	Min. House Roof Height	89 cm
Features	Min. House Roof Weight	37 kg
	Raw material	LLDPE
