

PY-116

Fitness Hand Disk

- The arm turning disc is designed and produced in a way that allows it to be used in the arm turning parts of the sports equipment and is robust.
- The seat and backrest are produced from polyethylene plastic material mixed with glass fiber by LLDPE (Linear Low Density Polyethylene) injection method.
- It has a spinning top that will make it easier to hold on its front surface and circular reliefs on the entire surface.
- Connection plate slot on its back surface and 4 m 8 nuts are placed inside.
