

PY-21 H: 200 Flat Slide

- LLDPE (Linear Low-Density Polyethylene) made of self-colored polyethylene plastic material, which is designed to slide from a 200 cm high platform, has a minimum length of 4 meters, is produced in a single piece and double-walled form with a minimum weight of 42 kg.
- It is manufactured in such a way that the inner height dimension of the side protective corners of the slide is 17 cm, the width of the sliding surface is 40 cm, and the slope is 25-30 degrees.
- The slide is fixed to the ground with a metal apparatus from the anchorage point at the bottom of the slide's exit point.
- In order for the product surface to be smooth; Sandblasting is applied to the surface of the mold made of aluminum or its equivalent material, and it is produced by passing the Teflon coating process for surface brightness.
- A flat slide entrance panel is used to ensure safety at the slide entrance.
- LLDPE (Linear Low-Density Polyethylene) from self-colored polyethylene plastic material is produced in one piece by rotation molding method.
- Plastic clamp with straight connection apparatuses connection to the Ø 27 mm inner pipe ends attached to the inside of the polyethylene flat slide entrance panels and fixed to the Ø 114 mm tower pipes.

Dimensions	Platform Height	200 cm
	Side Wall Length	17 cm
	Slide Inner Width	40 cm
	Slide Length	380 cm
Features	Raw material	LLDPE
	Min. Slide Weight	42 kg
