Bird Nest Swing Seat

- The circle around the incubator seating surface will be manufactured from Ø 42 SDM pipe in accordance with the appearance in the technical drawing. Incubation knitting will be done in this circle.
- The carrier will be connected to the horizontal pipe with the rope and connection apparatus.
- The seating surface, which is knitted from rope or plastic materials, should have a tight knitting system so that it is protected against hand and foot pinching of small children and babies.
- The connection of the ropes is made with the help of bolts and terminals, in a way that they can be mounted.

Dimensions	Minimum Swing Seat Weight	14 kg
	Bird Nest Swing Seat Diameter	90 cm
